## SUMMARY

Aspiring DevOps Engineer with project-based experience in AWS infrastructure automation and CI/CD workflows. Familiar with Linux, Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, and cloud infrastructure concepts. Seeking an entry-level opportunity to apply DevOps skills and gain practical industry experience.

## SKILLS

- **Cloud (AWS):** EC2, VPC, IAM, S3, EKS, Elastic IP, NAT Gateway, Internet Gateway, Route Tables, Security Groups
- **DevOps & IaC:** Linux, Bash/Shell Scripting, Git/GitHub, Docker, Kubernetes, Helm, Terraform, Ansible
- **CI/CD & Security:** Jenkins, GitHub Actions, SonarQube, Trivy, Nexus Repository, Argo CD
- **Monitoring:** Prometheus, Grafana
- **Programming:** JavaScript, React.js, Node.js, Express.js, Python

## WORK EXPERIENCE

### Full Stack Developer Intern | IFANDFOR ENDEAVORS | Jun 2025 – Dec 2025

- Developed and maintained web application features using React, Node.js, and backend APIs.
- Implemented frontend components, integrated APIs, and supported application functionality through database operations.

### Junior Testing Engineer | MicroLab | June 2024 – May 2025

- Conducted material quality testing and verified results against specified testing procedures and quality requirements.
- Recorded test results and updated inspection data in company software, maintaining accurate documentation and process tracking.

## PROJECTS

### Production-Level Three-Tier Blog Application CI/CD Deployment on Amazon EKS

- Developed a three-tier application consisting of frontend, backend, and database components using Docker-based containerization.
- Implemented CI/CD automation using Jenkins and GitHub Actions, including SonarQube code analysis and Trivy vulnerability scanning.
- Deployed the application on Amazon EKS using Kubernetes Deployments, Services, ConfigMaps, Secrets, rolling updates, and health probes, with Prometheus and Grafana for monitoring.

### Java Application CI/CD Using Jenkins, Maven, SonarQube, Docker, Helm & Argo CD

- Developed a CI/CD pipeline for a Java application using Jenkins, Maven, and SonarQube for automated build, testing, and code quality analysis.
- Containerized the Java application using Docker and managed Kubernetes deployment configuration using Helm.
- Configured GitOps-based deployment using Argo CD to synchronize application configurations from Git to Kubernetes.
- Configured Kubernetes deployment with rolling updates, health probes, and versioned Docker images.

## CERTIFICATIONS

- DevOps Certification - **HCL GUVI**

## EDUCATION

- Velammal Engineering College — B.E, 2020–2024 | CGPA: 7.66
- Sethu Bhaskara MHSS — Higher Secondary Certificate (HSC), 2020 | 65.6%
- Sethu Bhaskara MHSS — Secondary School Leaving Certificate (SSLC), 2018 | 80.2%
